

Restigouche 2017

SCIENCE COMMITTEE / COMITE SCIENTIFIQUE

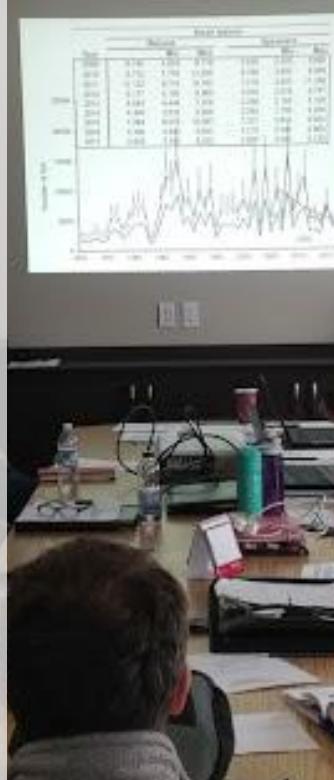

CONSEIL DE GESTION DU BASSIN-VERSANT DE LA
RIVIÈRE RESTIGOUCHE INC.

RESTIGOUCHE RIVER
WATERSHED MANAGEMENT COUNCIL INC

SCIENCE COMMITTEE / COMITE SCIENTIFIQUE

Terms of Reference

- Advise on science matters pertaining to the management goals and program for the Restigouche Atlantic salmon
- Coordinate the planning and implementation of stock assessment and research programs
- Review the annual stock assessment for the Restigouche Atlantic salmon
- Provide detailed outlines of stock assessment program, and supporting research

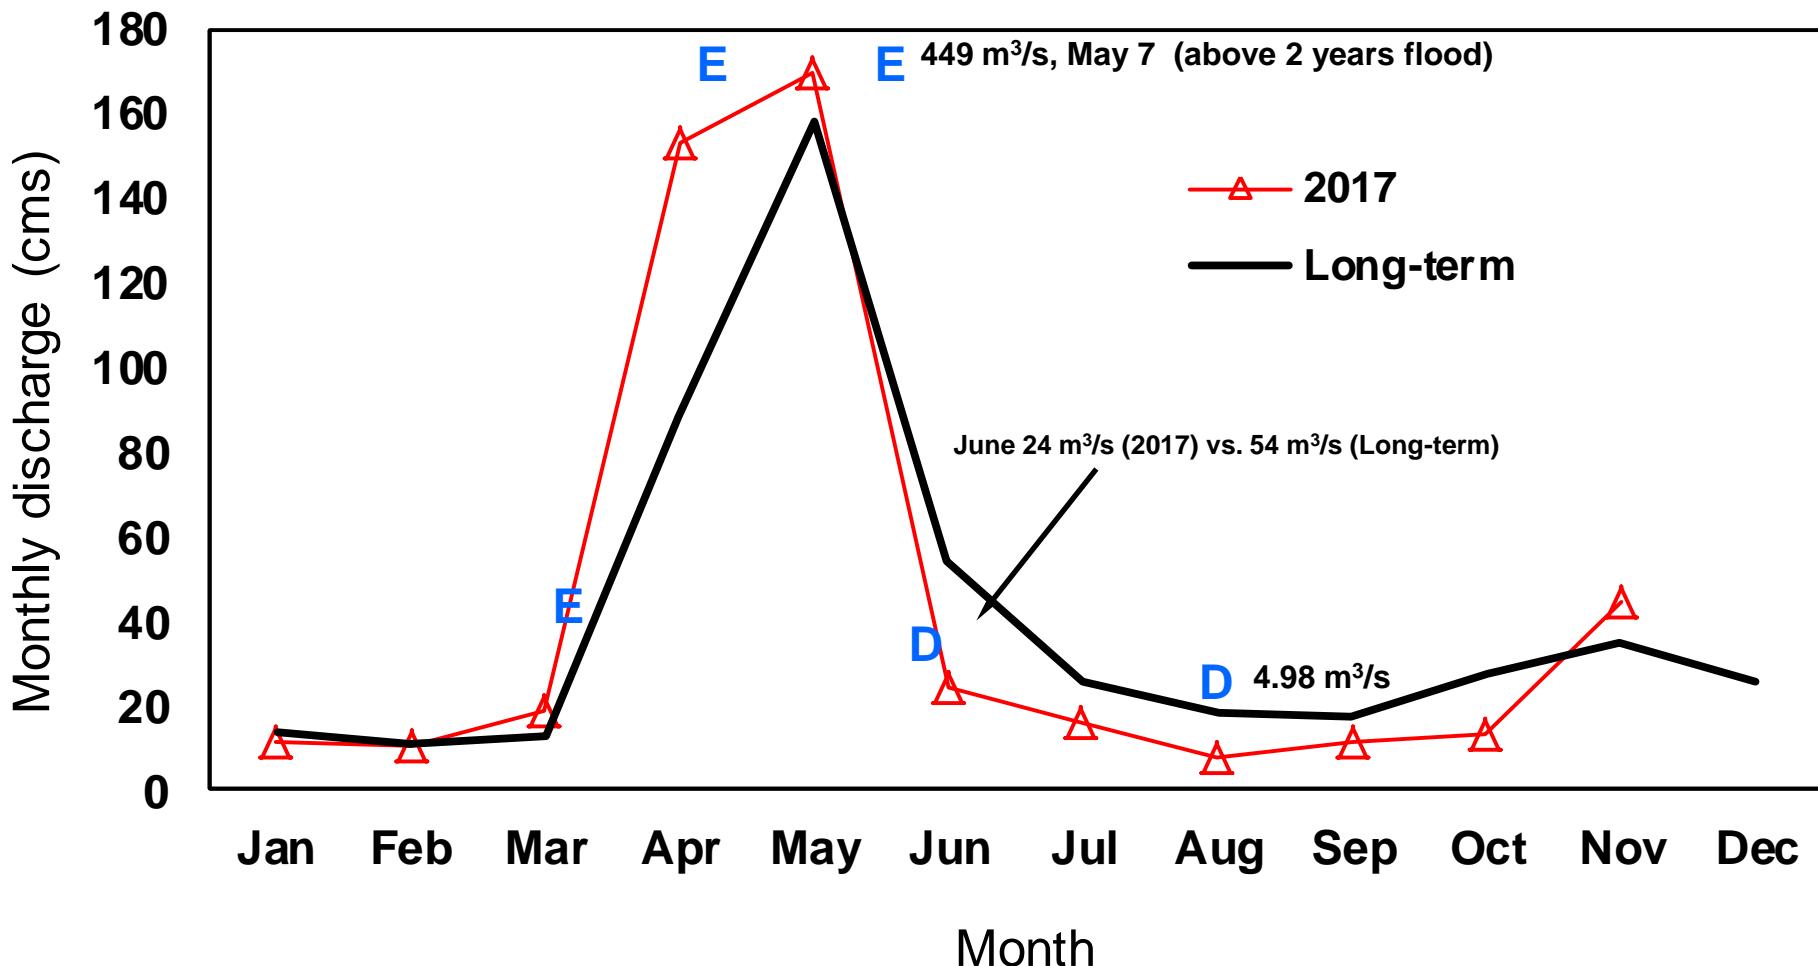

Mandat

- Aviser sur les aspects scientifiques relatifs aux objectifs de gestion et au programme du saumon de la Restigouche
- Coordonner la planification et l'amélioration des programmes d'évaluations et de recherche
- Revoir l'évaluation annuel de l'état des stocks de saumon de la Restigouche
- Recommandation sur programmes d'ensemencement et autres recherches

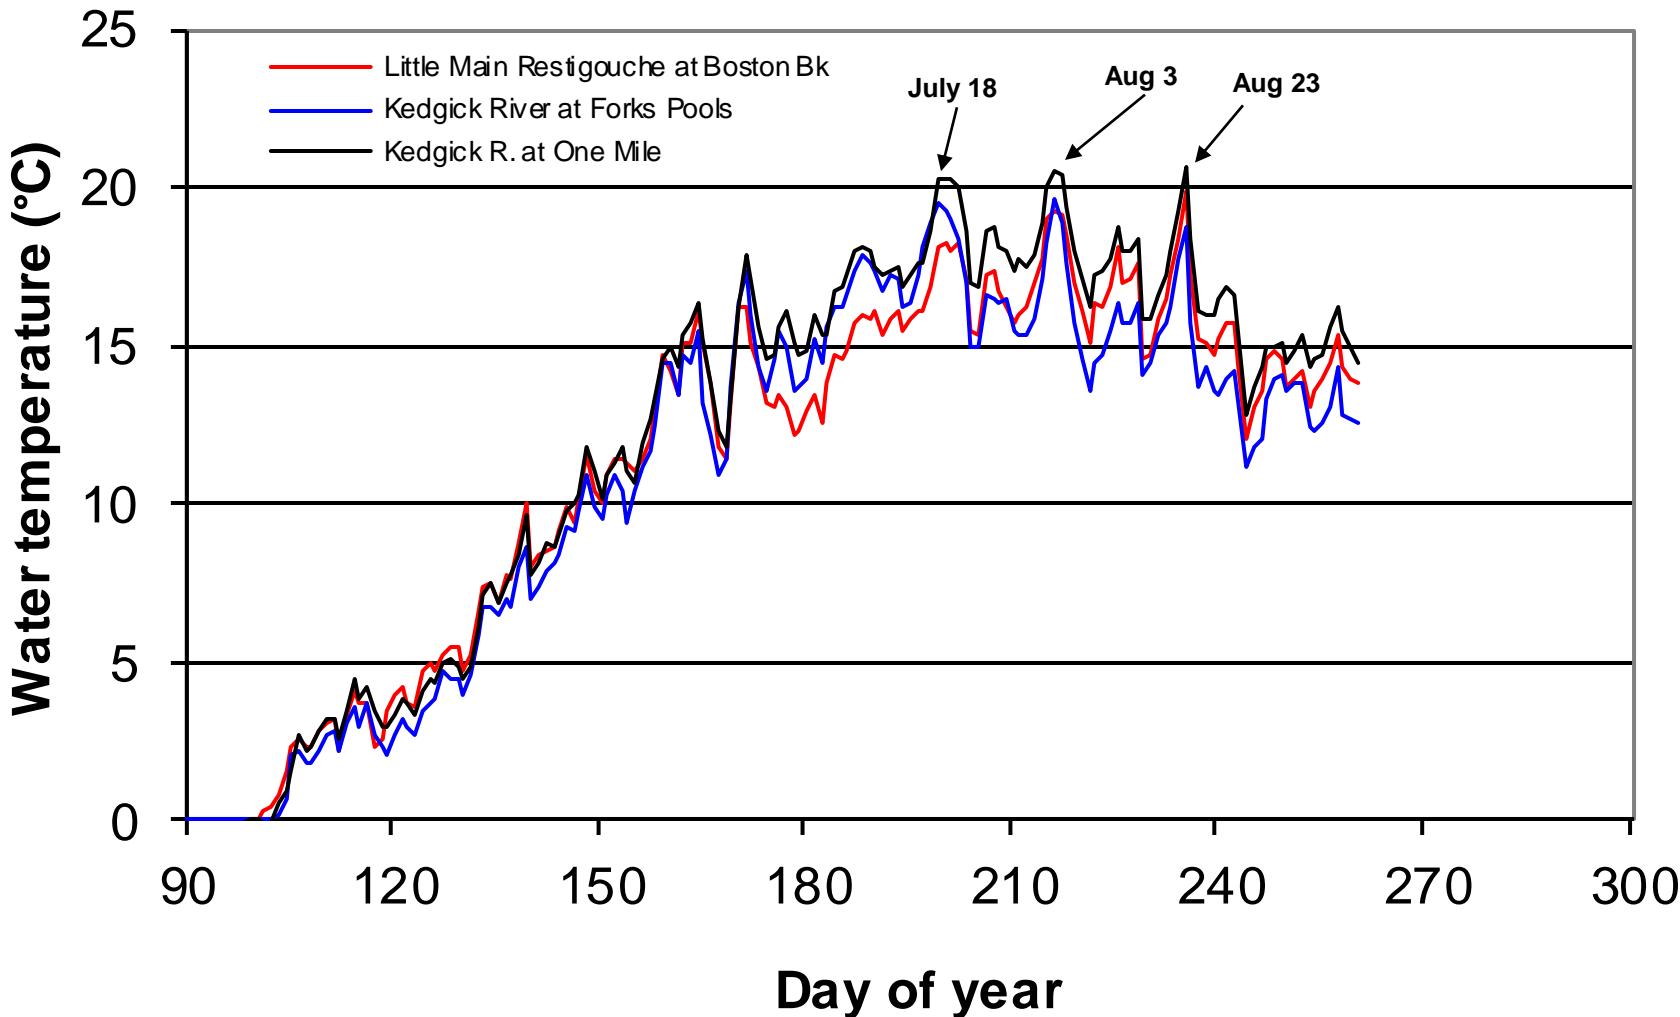

Environmental conditions

Water Temperatures (2003-2017)

Summer water temperature statistics (July & Aug) for Restigouche River and tributaries (2003-2017)				
	2003-2017	2017	2003-2016	2017
River	Mean	Mean	Max	Max
Kedgwick River at Forks Pool	14.9	16.2	23.8	22.4
Kedgwick River 1 Mile bridge	16.2	17.8	25.3	23.5
Upsalquitch River at Crib Pool	17.4	18.7	25.7	24.3
Patapedia River at 2 Mile	15.6	16.8	23.7	22.2
Patapedia River at 30 Mile	16.6	16.6	25.9	23.8
Restigouche River at Two Brooks	17.3	18.5	24.5	23.2
Restigouche River at Butters Island	18.6	19.7	27.1	24.2
N.W.Upsalquitch River at Ten Mile Pool	17.1	18.3	27.5	24.4
S.E.Upsalquitch above Basket Rock	16.2	17.6	24.5	23.5
Upsalquitch River at Two Brooks	17.3	18.8	24.5	23.9
Causapscal River at Barrier	16.3	16.6	26.8	22.2
Matapedia River below mouth of Causapscal	17.3	17.6	24.7	23.4
Little Main Restigouche River at Boston Brook	15.4	16.4	24.5	22.6

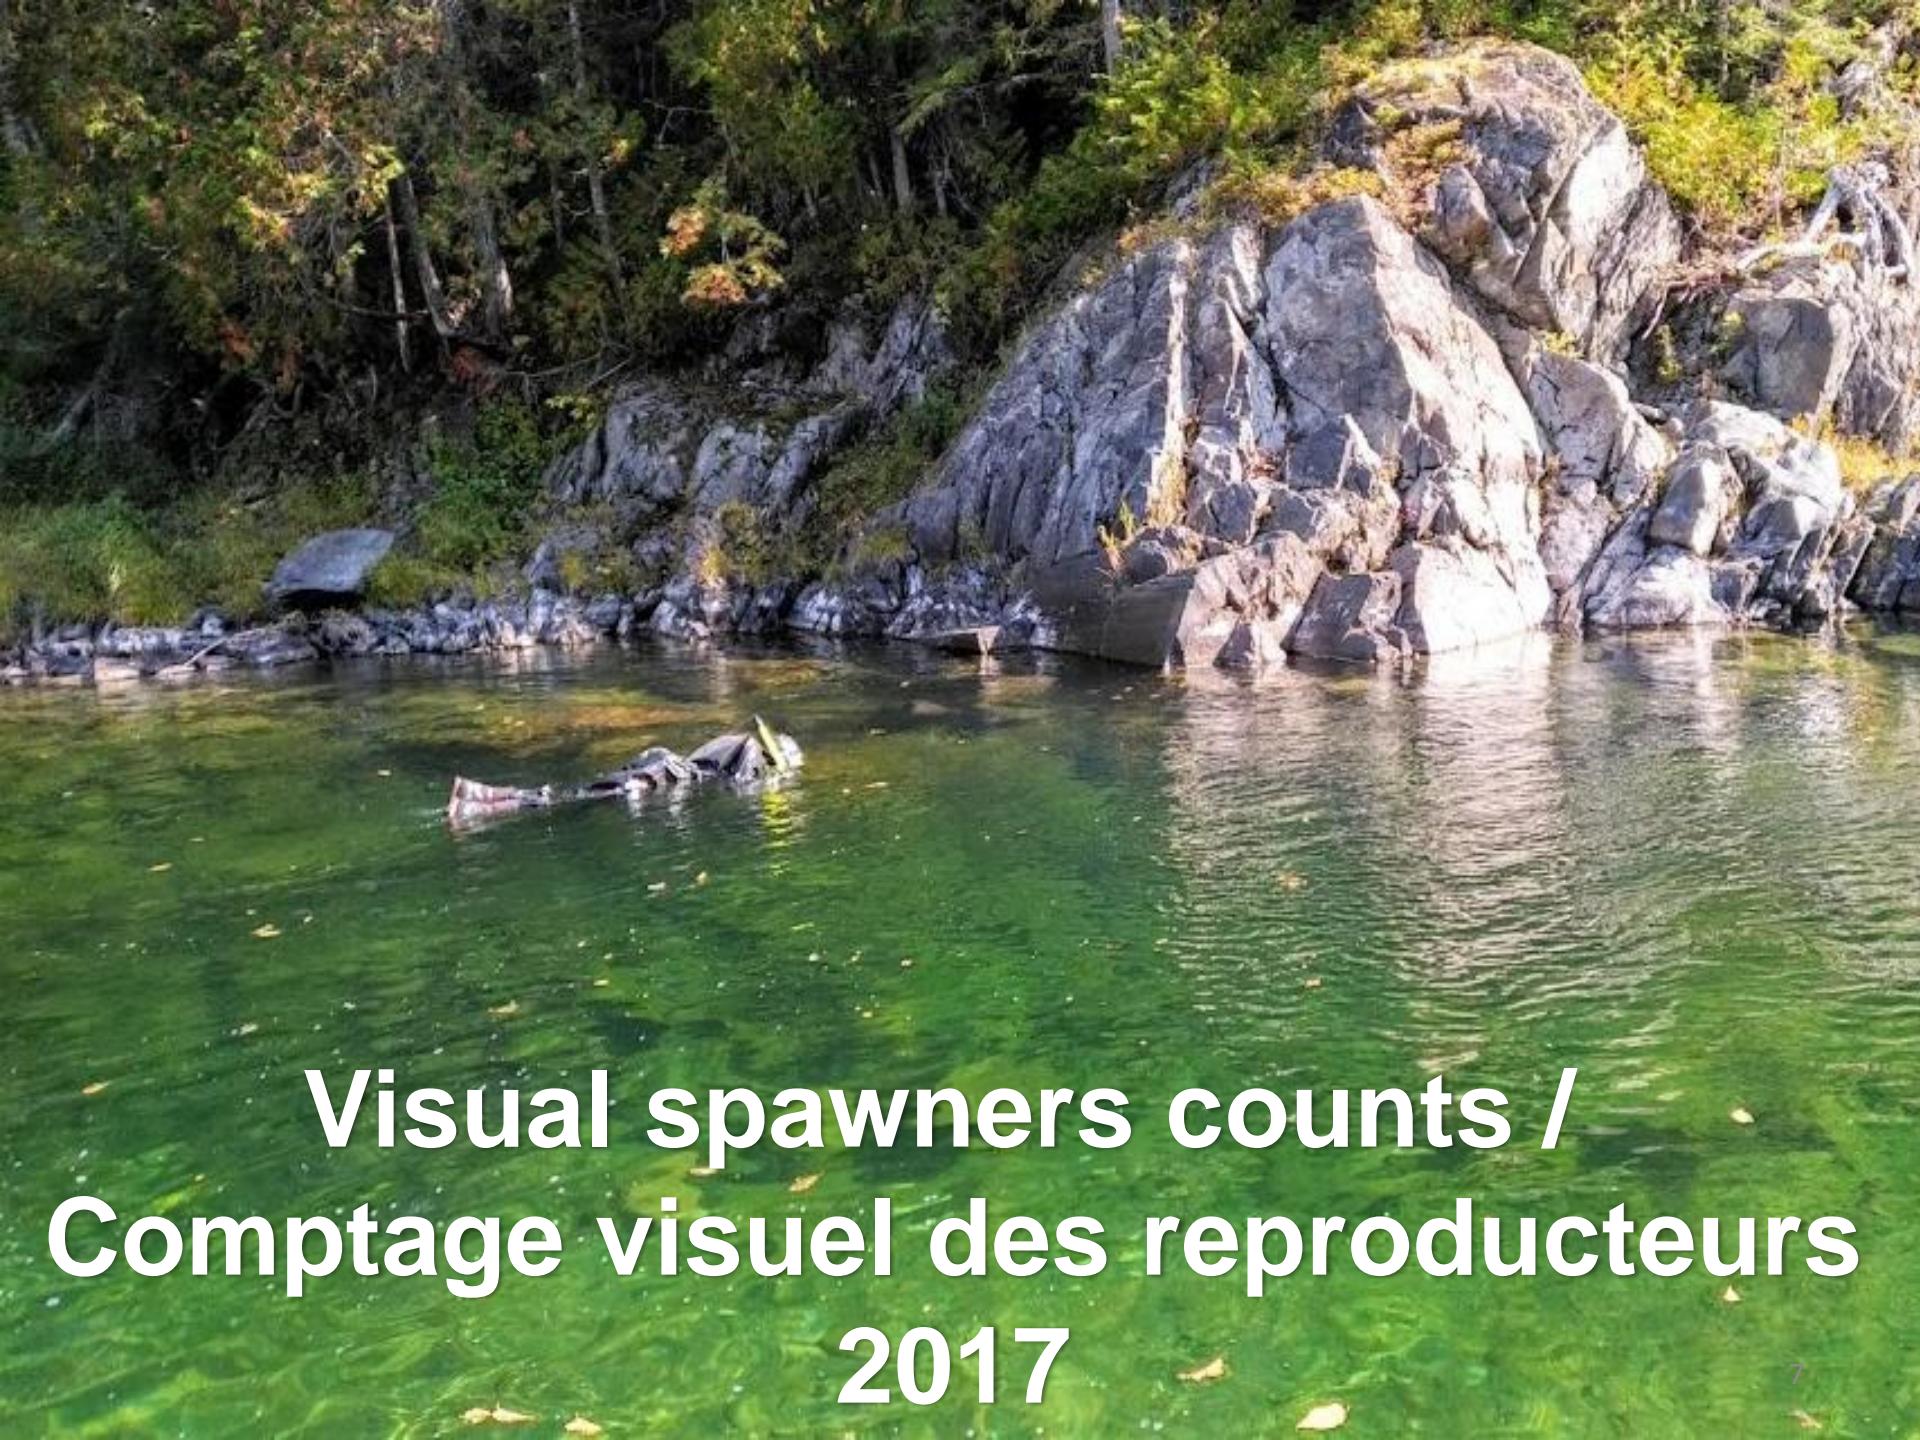

Mean temp. slightly higher than average conditions (+1.0°C)

Max temp. (2017) = 22.2°C to 24.4°C

Environmental conditions

Summary

- Excessive flows in March, April and May
- Spring peak flow on May 7 ($449 \text{ m}^3/\text{s}$), slightly above the 2-year flood
- Deficient flow in June ($24 \text{ m}^3/\text{s}$ vs. $54 \text{ m}^3/\text{s}$) and August, however, flows were below normal from June to October
- Low flows in summer close to 2-year event ($5 \text{ m}^3/\text{s}$), no winter low flows ($9.5 \text{ m}^3/\text{s}$)
- Mean summer WTs were slightly higher than normal in 2017 ($+1.0^\circ\text{C}$)
- Maximum WT (22.2°C to 24.4°C)
- High WT temperature events were: July 18, August 3 and August 23

2017

Spawners count

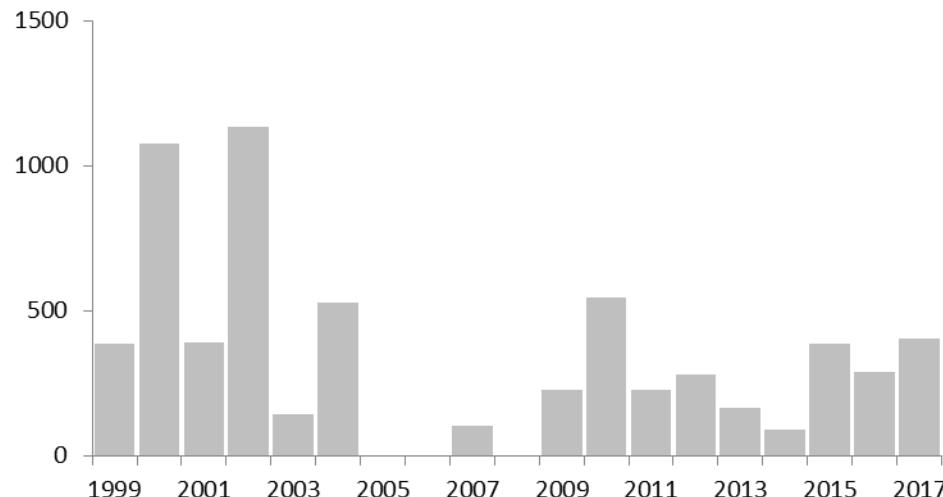

Snorkel counts - 2017

- Assistance was provided by RRWMC
- Tributaries (Kedgwick, Little Main, Gounamitz, Upsalquitch and Patapedia Rivers) were completed from Sept. 18 to 23.
- For logistical reasons the Gounamitz stretch from Dave Richards Brook to Gounamitz Falls was accessed by vehicle.
- The main stem Restigouche River was completed from Sept. 25 to 28.
- Visibility was generally good (8 to 10/10).
- Overall the observed salmon and grilse seemed to be in generally good physical condition with some fungus noted.

Connectivity model study 2017-2018

Watershed-scale connectivity analysis: An applied GIS model towards the strategic management of barriers to Atlantic salmon migration in the Restigouche River watershed (2017-2019)

Michael J. Arsenault, Allen Curry, Carole-anne Gillis, David LeBlanc,
Tommi Linnansaari, and Jae Ogilvie

Connectivity model study 2017-2018

Undersized crossing

Perched crossing

Beaver dam blockage

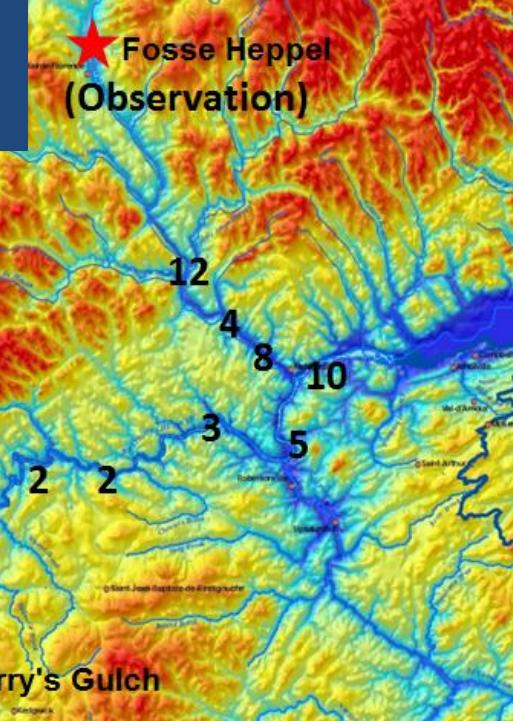

Connectivity model study 2017-2018

Outcome

- An adaptive, cost-effective approach for maintaining road networks
- A detailed inventory of culverts and beaver dams within the watershed
 - A model that can predict stream networks based on DEM (LIDAR) data that can be used on other watersheds
 - A set of models that can identify culverts that have a high chance of preventing upstream migration

Striped Bass observation / report

Sector	# Striped bass reported
Matapédia River – public (Glen Emma 12, + 8 on sector 1)	20
Matapedia River– Private (Tobique 2, cold spring 2)	4
Restigouche below Upsalquitch	15
Restigouche above Upsalquitch (Pine Island 2, Cheuters 2, Larrys 1, Brandy 3, Harmony 5)	8
	47

+ A shoal of 20 striped bass observed in Haley's pool and 6 at Heppel during mid- season July count

Striped Bass observation / report

Scientific permits issued in 2017

Dept. Fisheries and Oceans - Article section 52 to RRWMC

- Issued on August 11th 2017
- Required to put guides name on the permit
- No catch reported on the permit – most camp were closed mid August

Min. Forêt Faune et Parcs «permis SEG» to CGRMP

- Sub-permit given to anglers when buying daily access permit if desired to keep specimens and provide stomach content;
- No specimen provided

The image shows a scanned document of a scientific fishing permit. At the top, it features the Canadian coat of arms and the text "PERMIS DE PÊCHE POUR FINS SCIENTIFIQUES". Below this, it says "Numéro du permis : SG-RHQ-17-107". A note in French states: "En vertu de la Partie VII, article 52, du Règlement de pêche (dispositions générales), le présent permis est délivré à :". It lists "David LeBlanc" and "Conseil de gestion du bassin versant de la rivière Restigouche (CGBVR)", CP 995, Campbellton (Nouveau-Brunswick), G0V 1V0, 506-759-7300. The next section, "LES CONDITIONS DE PERMIS SUIVANTES S'APPLIQUENT AU PRÉSENT PERMIS:", contains a list of names and organizations, all associated with the Restigouche Salmon Club, along with their telephone numbers. The list includes Carole-Anne Gillis, Rick Irvine, Don Irvine, Brian Irvine, David Mann, Jean-Marc Savoie, Kevin Gray, Yves Dufour, Pierre Dufour, Michel Dorion, Karl Crearwell, Guy Arsenault, Charlie Adams, Paul Francoeur, Ricky Gray, Ludger Francoeur, Alexander Sandy Maserolle, Raymond Poirier, Rodney Gray, Daniel Boudeau, Jonathan Falle, Denis Apin, Michel Chassé, Camil Gallant, Jean-Paul Laroche, Jean-Guy Lelièvre, and Julie MacDonald, all with telephone numbers ranging from 418-865-2924 to 506-759-8112.

2018

- Regulation changes requested to remove size limit in fresh water (still pending) (actually 50-65 cm slot)
- If size limit still as actual, Permit section 52 will be requested;
- Renewal of SEG permit on the Matapedia?

Saprolegnia outbreak

- Worst outbreak since 2011
- September snorkeling count: Less than 10 % of fish observed had signs of saprolegnia
- RRWMC visual count Oct 17th -27th: 70 mortalities, 80% of fish infected on most tributaries

Real-time monitoring stations
